are the
and
PREPA
None.

PLACE
It grows in Borders of Fields, and Pasture Grounds.

DESCRIPTION.

The Leaves 1 and 2, spread round upon the Ground, and are of a d
inclining to the Willow, Fleshy, Smooth, Shining, Scallop'd round, ha
Footstalks, of a Deep Red, almost Crimson. The Flower Stalk 3, is firm,
a Light Green, with small Jagg'd Leaves; The Flower 4, is composed of many
Jagg'd at the Ends, with small Ribbs 5, encircling a Semi Globe of a fine glo
which are Florets 6, every one of 'em on a single Seed, the Situation of the
and Seeds appear at 7, where that part of the Daisy is cut Longitudinal
palement 8, is coverd with Scales of light Green, bordr'd with dark blackish
Edges, goes off so thing, as to lose their Colour. The ripe Seed 10 (having a d
on the Top) is ribbd, the Colours Purple and Silver in Stripes. These ca
magnified.

VIRTUES.

The Leaves are reckon'd Opening and Detergent, They posses a mo
Astringent Quality. The Flowers are Diuretic, but seldom met with
tions, as this Virtue is not sufficiently warranted from Experience.
